	DS-3 Leased line	Tsunami® 100Base T/F	Tsunami® Advantage
Acquisition Cost	$30,600[2]	$23,500[2]	20% saving up front
Monthly Cost	$3000[2]	0$	No monthly recurring costs
Deployment Time	Up to 4 months	Today	No wait

(1) Leased line prices vary according to distance and geographic location.
(2) Includes installation and 12T1 router cards. New routers may be required.
(3) Includes Tsunami 10Base T10 5.8 GHz link, cable kit, 2 antennas, 2 Ethernet router cards and installation.

Stop waiting for the telephone company

Tsunami® provides a true plug-and-play solution which can be deployed within days. License-exempt wireless technology can be deployed much more rapidly than leased line alternatives. Without regulatory delays, radio spectrum ownership issues or waiting for trenching or other telco provisioning, it is possible to create wireless LAN-to-LAN links in just a day or two.

Accomplish your objectives

Tsunami® is ideal for applications including:

- Building-to-building connectivity (LAN to LAN)
- Campus-to-campus connectivity (WAN)
- Fiber redundancy and media diversity to enhance reliability and uptime

Network Overview

Tsunami® wireless Ethernet bridges provide a portfolio of distance and capacity points using either Tsunami 10BaseT, 100BaseT/F or 1000BaseSX products. For example, a pair of Tsunami® 100BaseT/F wireless Ethernet bridges provide a Fast Ethernet connection between any two routers or switches. Rooftop mounted antennas are cabled to the indoor mounted Tsunami® bridges. The bridges interface directly to the 100BaseTX or 100BaseFX ports on the switches or routers. Tsunami® bridges provide seamless data link layer (Layer 2) connectivity, transparent to the ports on the switch or router. This configuration preserves native IP throughout the connection, eliminating conversion between interfaces.

Tsunami: A Broad Solution Offering

The Tsunami® family of wireless Ethernet bridges provides a wide range of distance and capacity solutions to meet your connectivity needs. The family consists of three product lines: the Tsunami® 1000BaseSX, the Tsunami® 100BaseT/F and the Tsunami® 10BaseT. Products within each product line vary in capacity and frequency (see table below).

	Tsunami® 1000Basesx	Tsunami® 100Base T/F	Tsunami® 10BaseT
Agregate Capacity	>840Mbps	206MBps, 93MBps	24MBps, 16MBps
Frequency	5.3, 5.8GHz	5.3, 5.8GHz	2.4, 2.8GHz

About Proxim

Proxim Wireless Corporation (OTC Markets: PRXM) provides Wi-Fi®, Point-to-Point and Point-to-Multipoint 4G wireless network technologies for wireless internet, video surveillance and backhaul applications. Our ORiNOCO® and Tsunami® product lines are sold to service providers, governments and enterprises with over 2 million devices shipped to over 250,000 customers in over 65 countries worldwide. Proxim is ISO 9001-2008 certified. For more information, visit www.proxim.com. For investor relations information, e-mail ir@proxim.com or call +1 413-584-1425.
