

Tsunami® MP-10250-BSX

Advanced Point-to-Multipoint Wireless Base Station

Designed to Maximize Bandwidth and Link Reliability in Noisy Environments

The Tsunami® MP-10250-BSX is an intelligent base station that implements a beam steering (BeamX™) antenna and a secondary, look-ahead scan radio (SmartScan™) to mitigate interference and take full advantage of the high throughput capability of the Tsunami® 10000 product line. This product is extremely robust in the face of high ambient RF interference, delivers more Mbps at a given point in the network and opens up additional 5GHz spectrum.

The Tsunami® MP-10250-BSX supports the following features for applications that include last mile access or video surveillance, both of which need uninterrupted high speed, and prioritized broadband wireless access:

Proxim WORP®, combines network access control, data scheduling, advanced QoS and encryption to ensure highly efficient and secure data transmission.

Proxim ClearConnect™, a suite of interference mitigation technologies ensuring robust and reliable communications in high-density wireless deployments.

Proxim SmartConnect™, delivering exceptional performance in noisy RF environments by combining a beam steering antenna with a secondary look ahead scan radio to seek, manage and select the best channel.

Fast, Secure and Flexible

- Point-to-Multipoint base station that delivers up to 866 Mbps data rate and covers distances up to 10 miles (16 km)
- AES 128 encryption, Radius authentication and highly-secure remote management via SSL/TLS1.2, SSH and SNMPv3
- Service flow based QoS with deep packet inspection (DPI) to ensure that the most important data arrives with priority
- Built-in feature rich network protocols for IPv4 and IPv6 bridging, routing and gateway functionality

Proxim SmartScan™

- Performs background analysis of the full RF spectrum and creates channel availability tables to allow an immediate switch to a free channel in case of weather radar detection or heavy interference
- By removing the initial transmission delay, SmartScan makes DFS channel more efficient
- It also opens access to the 5.600–5.650 GHz sub-band, and enables effective use of up to 355 MHz of DFS spectrum

BeamX™ Antenna

- Smart antenna delivering a 17° beam that electronically steers itself to the remote subscriber unit over a 60° sector, to limit interference from nearby RF sources
- By improving the radio Signal to Noise Ratio (SNR), BeamX enables higher modulations and thus improves throughput

Rugged and Reliable

Designed for harsh environments, the Tsunami® MP-10250-BSX is fully IP67 rated, and will deliver years of reliable service in conditions that include, high winds, high salt, and high temperature extremes.

Product Line Compatibility

- Connects to all existing Tsunami® MP/XP 10100, MP-10100L, MP-8200, MP-820 and MP-830 products
- Fully integrates within ProximVision® Advanced Cloud Based Carrier Management System and Controller

About Proxim Wireless

Proxim Wireless is a pioneer and global leader in advanced Wi-Fi, point to point, and point to multipoint outdoor wireless systems that deliver high performance and high availability communications.

With over 30 years of wireless experience, Proxim is recognized for its unparalleled reliability, superior performance and drive for innovation.
