Northrop Grumman Deploys Proxim Broadband Radios for U.S. Air Force Digital Wireless System

Enables greater distance, bandwidth and security for tactical warfighters in remote areas

Silicon Valley, CA (December 20, 2012) – Proxim Wireless Corporation (OTC Markets: PRXM), a leading provider of complete outdoor wireless backhaul systems, today announced Northrop Grumman Corporation (NYSE: NOC) has deployed the Theater Deployable Communications (TDC) Wireless Distribution Module (WDM) for the U.S. Air Force using Proxim Wireless Tsunami™ MP.11 HS 4454 equipment. Northrop Grumman developed and produced 140 WDM suites for the Air Force Life Cycle Management Center at Hanscom Air Force Base, Mass.

Proxim Wireless' Tsunami™ MP.11 HS 4454 is an ultra-secure FIPS 140-2 level 2 certified point-to-multipoint solution for federal, Department of Defense and NATO applications. It supports a wide range of frequencies with support for NATO and unlicensed frequency bands at very long distances using a single dual band radio with built-in AGC.

The TDC is a ground-to-ground communications infrastructure that transmits and receives voice, data and video communications via wireless, satellite or hard-wired sources. It is an essential communication infrastructure for computers, phones and imagery, especially in mission critical remote locations. WDM is the newest IP networking component of the Air Force's TDC system and consists of a single radio, operating in both commercial and NATO frequency bands.

"Fielding of TDC WDM puts the next-generation of wireless networking in the hands of today's warfighters," said Chris Maier, senior program manager of deployable communications for Northrop Grumman Information Systems. "As an industry partner with the military, we understand the complexity of the government's need for state-of-the-art remote communications with the assurance of security, accessibility and reliability. Proxim's HS 4454 equipment has been tested at distances greater than 45 miles in both the NATO and unlicensed band."

"Northrop Grumman has been instrumental to the Air Force's communication systems and choosing the most qualified and certified equipment vendors," said Geoff Smith, Vice President Business Development, Strategic Accounts at Proxim Wireless. "Our equipment has been a trusted source of communications for local, state, and federal government agencies as well as humanitarian relief operations due to mobile, modular and quickly deployable systems."

About Proxim Wireless

Proxim Wireless Corporation (OTC Markets: PRXM) provides [Wi-Fi®](#), [Point-to-Point](#) and [Point-to-Multipoint](#) 4G wireless network technologies for wireless internet, video surveillance and backhaul applications. Our [ORiNOCO®](#) and [Tsunami®](#) product lines are sold to service providers, governments and enterprises with over 2 million devices shipped to 250,000+ customers in more than 65 countries worldwide. Proxim is ISO 9001-2008 certified. For more information, visit www.proxim.com. For investor relations information, e-mail ir@proxim.com or call +1 413-584-1425.

Safe Harbor Statement

Statements in this press release that are not statements of historical facts are forward-looking statements that involve risks, uncertainties, and assumptions. Our actual results may differ materially from the results anticipated in these forward-looking statements. The forward-looking statements involve risks and uncertainties that could contribute to such differences including difficulties in overcoming the network installation and operational challenges relating to any specific customer or geographical area; factors beyond our control such as weather, geographic, governmental, and interference issues that may increase the costs and difficulties of wireless deployments; specific requirements of a given customer in their specific situations; whether the deployment will achieve the desired objectives of any given customer; and difficulties or delays in supplying products with the features, performance, compliances, certifications, cost, price, quality, and other characteristics desired by customers. Further information on these and other factors that could affect Proxim's actual results is contained in the filings made by Proxim with the OTC Markets (available at www.otcm Markets.com), including without limitation in the Annual Report filed by Proxim on March 30, 2010, and is and will be contained in its other public statements, which may be available on Proxim's website (www.proxim.com).
