Proxim Wireless Mesh Charts in at #3, with a Bullet

Company shoots to #3 in units in their inaugural appearance in Dell'Oro mesh market share report

San Jose, CA, September 12, 2007 – Proxim Wireless Corporation (NASDAQ: PRXM), a leader in core-to-client solutions for broadband municipal wireless networks, today announced that it has made its first appearance on the Dell'Oro Group's Wi-Fi mesh market share report, achieving third position in units shipped during the second quarter of 2007.

According to the Dell'Oro Group’s 2Q07 Wireless LAN report, Proxim was third in unit market share in the Service Provider (i.e., mesh) segment, behind Nortel and Tropos. The report also listed Proxim as fourth in radios shipped and fifth in revenue.

"For Proxim to come from nowhere to third in the market in one quarter is a phenomenal accomplishment," said Robert Fitzgerald, CEO of Proxim Wireless. "The rapid growth of our mesh products is a testament to both the dynamic nature of the market, quality of our products, and the dedication of the Proxim team."

For those of you who were confused by the headline, it’s a reference to the days when Billboard published the Top 40 list of singles (those 45 RPM vinyl records with the big hole in the middle). A record that was moving up the chart rapidly was designated by a black dot called a bullet.

About Proxim Wireless
