Proxim Wireless and OciusB2 Provide Wireless Network for Digital Inclusion Community Projects in St. Helens and North Liverpool

SAN JOSE, CA, May 28, 2008 (MARKET WIRE via COMTEX News Network) -- Proxim Wireless Corporation (NASDAQ: PRXM), a leader in core-to-client solutions for broadband wireless networks, today announced that it is supplying broadband wireless equipment to the Advanced Internet Methods and Emergent Systems (AIMES) Centre, part of the University of Liverpool, to provide internet access for users across the Liverpool City Region, as part of a digital inclusion project.

AIMES is currently implementing two community-based pilot projects, one in St. Helens and one in North Liverpool providing a managed service, which includes broadband internet access, a range of software packages and all equipment required. For the first 12 months of the pilot project, the service is provided free of charge. The AIMES Centre was responsible for the tender process which was subject to the Official Journal of European Union (OJEU) criteria. OciusB2 was awarded the contract and as part of their tender specified the wireless network, which incorporates Tsunami MP.11 5054 base stations and Tsunami MP.11 5012 indoor and outdoor subscriber units from Proxim Wireless.

Professor Dennis Kehoe, Director of AIMES, said: "Digital inclusion is a crucial enabler of economic regeneration and growth. Digital access can transform cities and communities, providing improved access to employment, education and health information. The internet can also help to combat isolation and increase a sense of community. The aim of the Community Grid is to bridge this digital divide, to ensure that everyone can have affordable access to the benefits of computing. Wireless is a key part of this strategy as it is the most cost effective way to provide high speed broadband access to the community. The Proxim Wireless network has been extremely reliable since its installation and its scalability means that it will be able to accommodate our expanding project."

"We chose the Proxim Wireless equipment since we have used it in many other installations where it works flawlessly and compared to other solutions in the market, the Proxim equipment gives you more capacity for the same cost. The Digital Inclusion Project is being deployed in phases and should eventually cover users across the entire Liverpool City Region," explained George Porter, Director of OciusB2 Ltd.

"The digital divide has a significant impact on families and communities, and we're pleased that our technology can help lessen the inequalities in our society. We applaud AIMES for implementing these community-based projects and look forward to seeing the benefits this network will bring to Liverpool," added Anthony Fulgoni, VP Sales Northern Europe and Strategic at Proxim Wireless.

About AIMES

AIMES (Advanced Internet Methods and Emergent Systems), a technology transfer centre of The University of Liverpool, is a key point of access for businesses wishing to take advantage of advanced internet technologies. The AIMES Centre provides a range of services including digital inclusion programmes, applications provision and management, database systems, software development, hosting and storage, as well as on-demand, low-cost web services.

AIMES was established with funding from the European Regional Development Fund http://www.euandmerseyside.org/, the Northwest Regional Development Agency http://www.nwda.co.uk/ and the Single Regeneration Budget http://www.liverpool.gov.uk/ and is supported by The University of Liverpool http://www.liv.ac.uk/.

About OciusB2

OciusB2 is a technology-based company with extensive experience in e-communications, specializing in broadband internet and data communications with emphasis on the impact of these technologies on organizations and their service delivery capabilities. OciusB2 was founded in January 2002 in order to meet the growing challenges of companies and organizations moving into e-commerce and the use of internet related technologies. OciusB2 is a Proxim Platinum Partner.
