Proxim Wireless and Axis Communications Enable Wireless Video Surveillance in Amsterdam, Holland

BSSG Deploys Complete Wireless Video Surveillance System to Deter and Reduce Crime

SILICON VALLEY, CA -- (MARKET WIRE) -- 12/06/10 -- Proxim Wireless Corporation (OTCQX: PRXM) (PINKSHEETS: PRXM), a leading provider of complete indoor and outdoor wireless broadband systems, today announced that Bruers Service Security Goirle (BSSG), a leading integrator of security systems in Amsterdam, has deployed a complete wireless video surveillance network in Amsterdam's Stadsdeel West neighborhood utilizing Proxim's end-to-end wireless solutions and Axis Communications' network cameras. To provide connectivity for the Axis network cameras in a neighborhood where physical connectivity was not an option, BSSG deployed a combination of Proxim's Tsunami® QB-8150 point-to-point wireless backhaul, Tsunami™ M8100 point-to-multipoint, and Tsunami™ M8150-CPE subscriber units for a completely wireless surveillance network.

"In Amsterdam's Stadsdeel West neighborhood, they had a critical need for video surveillance, but it was not economically feasible to deploy fiber connections to all of the video cameras," said Johan Bruers, owner of BSSG. "Having deployed Proxim's wireless solutions for video surveillance connectivity several times before, we knew that Proxim provided the best performance and most reliable connection while being far more cost-effective than fiber."

By removing the limitation of relying on existing physical connections, Proxim's wireless solutions enabled BSSG to deploy the Axis network cameras in the exact locations that the city needed them. Due to the ease of installation of Proxim's solutions, the deployment time for getting the wireless video surveillance network up and running was a fraction of the time it would have taken to deploy fiber connections.

"The total installation time to have the Proxim wireless network up and running and the Axis network cameras connected was only a matter of days -- as opposed to the months it would have taken to deploy fiber," said Bruers. "The reason we chose the AXIS Q6032-E camera was because of the ease of use/installation and sharp images the camera provides. Remote monitoring is an important feature so retailers in the neighborhood can feel safer in the future."

As a result of the strong partnership between Axis Communications and Proxim Wireless, Proxim's solutions are ideally suited for full-featured support and connectivity of Axis' cameras. As a result, BSSG was able to deploy the entire surveillance network without any concern about the compatibility of the products or the ability of the wireless network to handle the high-bandwidth video requirements.

"Not only was the combination of Proxim's and Axis' products cost-effective and easy to deploy, but it has also proven to be incredibly effective as a deterrent to crime," added Bruers. "In the short time since installation, the city has already seen a notable reduction in crime in the covered areas."

About Axis Communications
Axis is an IT company offering network video solutions for professional installations. The company is the global market leader in network video, driving the ongoing shift from analog to digital video surveillance. Axis products and solutions focus on security surveillance and remote monitoring, and are based on innovative, open technology platforms. Axis is a Swedish-based company, operating worldwide with offices in more than 20 countries and cooperating with partners in more than 70 countries. Founded in 1984, Axis is listed on the NASDAQ OMX Stockholm, under the ticker AXIS. For more information about Axis, please visit our website at www.axis.com.

About Proxim Wireless
Proxim Wireless Corporation (OTCQX: PRXM) (PINKSHEETS: PRXM) provides Wi-Fi®, WiMAX, Point-to-Multipoint and Point-to-Point Backhaul technologies for a complete indoor and outdoor wireless broadband ecosystem. Our systems enable service providers, governments and enterprises to deploy fixed and mobile security and video surveillance, indoor and outdoor Wi-Fi, business and residential internet access and cell tower backhaul. Proxim has shipped more than 2 million wireless devices to more than 250,000 customers in over 65 countries worldwide. Proxim is ISO 9001-2008 certified. For more information, visit www.proxim.com. For investor relations information, e-mail ir@proxim.com or call +1 413-584-1425.

Safe Harbor Statement
Statements in this press release that are not statements of historical facts are forward-looking statements that involve risks, uncertainties, and assumptions. Our actual results may differ materially from the results anticipated in these forward-looking statements.
statements. The forward-looking statements involve risks and uncertainties that could contribute to such differences including difficulties in overcoming the network installation and operational challenges relating to any specific customer or geographical area; factors beyond our control such as weather, geographic, governmental, and interference issues; specific requirements of a given customer in their specific situations; whether the deployment will achieve the desired objectives of any given customer; and difficulties or delays in supplying products with the features, performance, compliances, certifications, cost, price, and other characteristics desired by customers. Further information on these and other factors that could affect Proxim's actual results is and will be contained in the filings made by Proxim with the OTCQX (available at www.otcqx.com), including without limitation in the Annual Report filed by Proxim on March 30, 2010, and in its other public statements, which may be available on Proxim's website (www.proxim.com).
