**Systems Integrated Expands LA County Traffic Control System Using Proxim  
Tsunami® GX800 Licensed Radios**

*Jane White, LA County, to speak at the ITS World Congress in Orlando, Florida on Tuesday,  
October 18<sup>th</sup> at 10:30 AM.*

**Silicon Valley, CA (October 17, 2011)** – Proxim Wireless Corporation (OTC Markets: PRXM), a leading provider of complete outdoor wireless backhaul systems, today announced the addition of Proxim Tsunami® GX800 licensed point-to-point radios to the existing 13 city-wide traffic control system deployment for Los Angeles County, California. This traffic control system already won a 2009 National Association of Counties Achievement Award for saving LA County an estimated \$7.0 million in costs over tradition copper or fiber optic installations.

“To enable LA County to reduce the number of leased telephone lines and, more importantly, to provide high-capacity communications over a non-contiguous geographic area spanning hundreds of square miles, we needed to be able to transmit all the traffic control system data and video images back to the LA County Traffic Management Center. Fiber was not feasible and too costly to install so Proxim GX800 18GHz radios were deployed,” stated Jane White, Senior Civil Engineer, LA County.

“The 320Mbps FDD capacity was just what we needed, and the product was very easy to deploy,” stated Larry Pomatto, President, Systems Integrated. “All of the Proxim products are centrally managed and with extensive support for licensed radio frequencies available, choosing the Proxim GX800 was a simple decision.”

“The Tsunami GX800 is available in a wide variety of frequencies from 6-38GHz worldwide and will be on display at this year’s ITS World Congress in Orlando from October 16-20. We are exhibiting at ITS booth 1202 and with our extensive wireless product line, we can provide customers with a complete solution for their ITS projects.” said Geoff Smith, Proxim’s VP of Sales for the Americas.

**About Proxim Wireless**

Proxim Wireless Corporation (OTC Markets: PRXM) provides Wi-Fi®, Point-to-Point and Point-to-Multipoint 4G wireless network technologies for wireless internet, video surveillance and backhaul applications. Our ORiNOCO® and Tsunami® product lines are sold to service providers, governments and enterprises with over 2 million devices shipped to over 250,000 customers in over 65 countries worldwide. Proxim is ISO 9001-2008 certified. For more information, visit [www.proxim.com](http://www.proxim.com). **Safe Harbor Statement**

Statements in this press release that are not statements of historical facts are forward-looking statements that involve risks, uncertainties, and assumptions. Our actual results may

differ materially from the results anticipated in these forward-looking statements. The forward-looking statements involve risks and uncertainties that could contribute to such differences including difficulties in overcoming the network installation and operational challenges relating to any specific customer or geographical area; factors beyond our control such as weather, geographic, governmental, and interference issues that may increase the costs and difficulties of wireless deployments; specific requirements of a given customer in their specific situations; whether the deployment will achieve the desired objectives of any given customer; difficulties in achieving any described features or performance in actual product deployments; regulatory and other issues associated with operating products in any specific frequency band in any specific geographic area; and difficulties or delays in supplying products with the features, performance, compliances, certifications, cost, price, quality, and other characteristics desired by customers. Further information on these and other factors that could affect Proxim's actual results is contained in the filings made by Proxim with the OTC Markets (available at [www.otcmarkets.com](http://www.otcmarkets.com)), including without limitation in the Annual Report filed by Proxim on March 30, 2010, and is and will be contained in its other public statements, which may be available on Proxim's website ([www.proxim.com](http://www.proxim.com)).
