Proxim Wireless Tsunami® Backhaul Equipment Now Available for Purchase through GSA Schedules

Silicon Valley, CA (September 7, 2011) – Proxim Wireless Corporation (OTC Markets: PRXM), a leading provider of complete indoor and outdoor wireless broadband systems, announces that its Tsunami® GX800, MP8100 and QB8100 wireless backhaul products are now available for purchase by U.S. Federal agencies, as well as many state and local government agencies, through a General Services Administration (GSA) Schedule Contract.

Proxim supply partner, Winncom Technologies, has a GSA Schedule Contract that includes the Tsunami GX800 and Tsunami QB8100 point-to-point and Tsunami MP8100 point-to-multipoint systems. As an established government vendor, Winncom’s GSA Schedule allows Proxim’s equipment to be more easily procured by government agencies, eliminating time-consuming responses to complex RFPs and lengthy negotiations.

The Tsunami GX800 product is a licensed microwave point-to-point link with up to 622 Mbps aggregate throughput. The Tsunami MP8100 product is a point-to-multipoint microwave transceiver operating in a wide range of licensed and unlicensed frequencies from 4.9-6.4 GHz, 2.3-2.5 GHz. The Tsunami QB8100 product is a point-to-point wireless bridge supporting a wide range of frequencies from 4.9-6.08 GHz and 2.3-2.5 GHz featuring Dynamic Frequency Selection (DFS) globally in all 5 GHz bands.

The GSA contract is important because Federal, state and local agencies and departments use the schedules to buy billions of dollars in products every year, and many of these agencies will only place orders through GSA Schedule Contracts. In 2010, more than $38.8 billion worth of products were sold through GSA Schedule Contracts with $15 billion spent on Information Technology, the leading government sales sector.

About Winncom Technologies
Winncom Technologies, a premier value-added distributor, works with leading technology manufacturers to provide their global client base with cutting-edge network solutions and premium support services. With a far-reaching, international scope, Winncom remains at the forefront of the global technology marketplace, demonstrating a reputation for quality products and a customer-centered business model.

About Proxim Wireless

Safe Harbor Statement
Statements in this press release that are not statements of historical facts are forward-looking statements that involve risks, uncertainties, and assumptions. Our actual results may differ materially from the results anticipated in these forward-looking statements. The forward-looking statements involve risks and uncertainties that could contribute to such differences including whether the inclusion of these Proxim products on the GSA schedules will have any positive or negative impact on Proxim; whether such inclusion will result in increased, quicker, or less time-consuming sales to governmental purchasers; factors beyond our control such as weather, geographic, governmental, and interference issues that may increase the costs and difficulties of wireless deployments; and specific requirements of a given customer in their specific situations. Further information on these and other factors that could affect Proxim's actual results is contained in the filings made by Proxim with the OTC Markets (available at www.otcmarkets.com), including without limitation in the Annual Report filed by Proxim on March 30, 2010, and is and will be contained in its other public statements, which may be available on Proxim's website (www.proxim.com).
