The Autonomous University of Chiapas Implements High-Tech Education
University Chooses Top Equipment Manufacturer to Enable Virtual Learning and New Educational Offerings

Silicon Valley, CA (July 7, 2011) – Proxim Wireless Corporation (OTC Markets: PRXM), a leading provider of complete indoor and outdoor wireless broadband systems, today announced the completion of a communications network with coverage for the Universidad Autonoma de Chiapas (UNACH), a leading independent university in Mexico. Eleven of the University’s municipal campuses now have intercampus voice, data, and video connectivity.

According to a 2011 Ambient Insight research report, 25 million post-secondary students in the United States will be taking classes online by the year 2015. In addition, the report states that the United States market for e-Learning products and services grew to $18.2 billion in 2010 and is expected to reach $24.2 billion in 2015. While this is a modest 5.9% compound annual growth rate (CAGR), the report predicts that Latin America is expected to grow at an 18% CAGR in this market by 2015.

As the demand for higher education through distance learning continues to accelerate at an astounding rate, the Autonomous University of Chiapas (UNACH) created “Red UNACH, CERO MAYA” which is the creation of a cutting-edge information and communication network. The infrastructure will strengthen the technological and telecommunications capabilities of the University in its various centers, schools and colleges, to benefit not only the University community but also the development of the State of Chiapas.

“The University is committed to its students and the community by providing high-quality education while strengthening our academic and administrative processes,” said José Samuel Ordaz Ruiz Technology Coordinator of Information at Universidad Autonoma de Chiapas. “During the equipment selection process, we conducted performance tests to ensure that the infrastructure will meet and exceed our accreditation standards and multi-campus communications needs. We were pleased with Proxim’s equipment stability which allowed us to expand our virtual university.”

“It gives us great pleasure to supply UNACH with an infrastructure that will allow students, not only in Mexico, but around the world to receive advanced education,” said Geoff Smith, Vice President of Sales of Proxim Wireless. “As the University continues to grow its student base and innovative virtual training, we are proud to play an indirect but important role in contributing to the future leaders of the world.”

About Autonomous University of Chiapas (Red UNACH Cero Maya)
Autonomous University of Chiapas is a leading independent university in Mexico founded in 1975 offering courses from law to the sciences. UNACH has taught over 21 million students and is home to 2500 faculty and administrative staff.

Safe Harbor Statement
Statements in this press release that are not statements of historical facts are forward-looking statements that involve risks, uncertainties, and assumptions. Our actual results may differ materially from the results anticipated in these forward-looking statements. The forward-looking statements involve risks and uncertainties that could contribute to such differences including difficulties in overcoming the network installation and operational challenges relating to any specific customer or geographical area; factors beyond our control such as weather, geographic, governmental, and interference issues that may increase the costs and difficulties of wireless deployments; specific requirements of a given customer in their specific situations; whether the deployment will achieve the desired objectives of any given customer; delays or changes in or cancellation of contemplated service offerings or product developments or deployments; and difficulties or delays in supplying products with the features, performance, compliances, certifications, cost, price, quality, and other characteristics desired by customers. Further information on these and other factors that could affect Proxim's actual results is contained in the filings made by Proxim with the OTC Markets (available at www.otcmarkets.com), including without limitation in the Annual Report filed by Proxim on March 30, 2010, and is and will be contained in its other public statements, which may be available on Proxim's website (www.proxim.com).
