**KPN HotSpots Deploys Proxim's New Compact, Robust, and High-Performance
Tsunami® 820 Series Products**

Silicon Valley, CA, April 13, 2015 – [Proxim Wireless Corporation](http://www.proxim.com) (OTC Markets: PRXM), a pioneer and global leader in advanced Wi-Fi, point to point (PtP) and point to multipoint (PtMP) radio systems, today announced the expansion of its relationship with KPN Hotspots, The Netherlands' largest provider of Wi-Fi hotspots.

KPN HotSpots has been extensively deploying Proxim ORiNOCO® access points for the last eight years in dozens of hotspot locations including:

- Hotel chains -- including Van Der Valk, Holland's largest hotel chain
- Restaurants and cafes -- including the Campanile, La Place and AC Restaurants
- Gas stations -- gas stations throughout the Netherlands offering customers the ability to connect and check email/Internet
- Railways and public transportation -- including NS railway stations
- Holiday Parks -- including Centreparks in the Benelux, France and Germany

KPN HotSpots has been evaluating different technologies to improve their backbone infrastructure in various locations, and Proxim's Tsunami® 820 series of subscriber units turned out to be the right solution. The Tsunami 820 point to multipoint products are full-featured but cost-efficient subscriber units that connect to Proxim's standard base station equipment. These products use the latest wireless technology providing secure high-capacity wireless transmission coupled with the OFDM and MiMO functionality often required by telecom operators. The products are ideally suited for the outdoor environment (including an IP67 rating) with their compact robust hardware and can be deployed and configured rapidly resulting in substantial cost savings compared to other technologies.

"We have been using Proxim's ORiNOCO Wi-Fi access points for many years as our goal has always been to provide our customers with the greatest Wi-Fi connectivity and this requires the support of solid technology partners," said Robert Kools, Manager Operations of KPN HotSpots. "As we continue to expand our network to new locations, we have been delighted to expand our relationship with Proxim with the deployment of their Tsunami 820 products."

For more information about KPN HotSpots, please visit their site www.kpn.com/hotspots.

“We are delighted about the expansion of our relationship with KPN HotSpots. We are pleased to support their continuing efforts to provide an outstanding wireless experience to their customers. The compact and robust 820 series launched last year has been well received by our partners throughout the region and has been generally recognized by them all as a great addition to the 8000 series product family,” said Simon Snowdon, Director Commercial of Proxim in Western Europe.

About KPN

KPN is the largest telecom and IT service provider in the Netherlands. For *consumer customers* KPN offers data broadband services, IPTV services, mobile (voice, data and SMS) and fixed line telephony. For *business customers*, KPN offers broadband services, mobile, fixed line and data services. Safe Harbor Statement

Statements in this press release that are not statements of historical facts are forward-looking statements that involve risks, uncertainties, and assumptions. Our actual results may differ materially from the results anticipated in these forward-looking statements. The forward-looking statements involve risks and uncertainties that could contribute to such differences including differences between difficulties in overcoming the network installation and operational challenges relating to any specific customer or geographical area; factors beyond our control such as weather, geographic, governmental, and interference issues that may increase the costs and difficulties of wireless deployments; specific requirements of a given customer in their specific situations; whether the deployment will achieve the desired objectives of any given customer; and difficulties or delays in supplying products with the features, performance, compliances, certifications, cost, price, quality, and other characteristics desired by customers. Further information on these and other factors that could affect Proxim's actual results is contained in the filings made by Proxim with the OTC Markets (available at www.otcmarkets.com), including without limitation in the Annual Report filed by Proxim on March 30, 2010, and is and will be contained in its other public statements, which may be available on Proxim's website (www.proxim.com).
