Dubai Investments Park Selects Proxim® High-Performance Tsunami® Multipoint Products for Video Security Network

Silicon Valley, CA, October 19, 2015 – [Proxim Wireless Corporation](#) (OTC Markets: PRXM), a pioneer and global leader in advanced Wi-Fi, point-to-point (PtP), and point-to-multipoint (PtMP) radio systems, today announced that Dubai Investments Park (DIP) has selected Proxim's® Tsunami® point-to-multipoint solutions. With Proxim, DIP has implemented a high-capacity wireless network to support its high definition (HD) video security infrastructure.

Spread over 2300 hectares, Dubai Investments Park is a self-contained, mixed-use complex that is equipped with world-class facilities and services for manufacturing, residential, academic, research and development, distribution, and logistics purposes. DIP consists of three major zones: Industrial, Commercial, and Residential. These complexes encompass everything from warehouses and high-tech industry facilities to showrooms, retail outlets, and residential infrastructure, making it virtually a city-within-a-city.

DIP required a high-speed, cost-effective network to enable video security for intrusion detection and monitoring purposes. Using a wireless network was the obvious choice for a rapid, low-cost deployment. Following an elaborate evaluation and competitive testing process, TechSource, the technical arm of Dubai Investments PJSC, which wholly-owns DIP, selected Proxim's Tsunami multipoint radios for their ease of use and unparalleled value. The multipoint radios are installed across the residential zone of the park and aggregate live feed from 40 HD closed-circuit television (CCTV) cameras and 6 fixed ALPR (Automatic License Plate Recognition) cameras to a central monitoring station.

“We are always looking at ways to enhance our network infrastructure and use the latest technology that provides us real world performance gains. We compared quite a few of the top wireless solutions and I have to say Proxim was a pretty easy choice from business standpoint. We continue to work with our partners to fully leverage TechSource's technical experiences in this domain for future projects,” said Venkatesh Mahadevan, General Manager, TechSource.

“We chose Proxim's Tsunami systems because they simply outperformed,” said Hojoh K.G, Head of IT Infrastructure, at TechSource. “The multipoint solutions demonstrated superior performance and deployment-simplicity over other technologies and products. Currently the deployment covers over 25% of the entire park area, and it only took us about 15 days for installation. Realizing the success of this project, we intend to scale further with Proxim's solutions for our future smart city projects.”

The deployment features Proxim's high performance, Tsunami point-to-multipoint solutions with advanced MIMO-OFDM and Proxim's proprietary WORP® technology to ensure robust connectivity. These Proxim solutions incorporate the latest AES standards and can be centrally managed via the recently launched, cloud-based ProximVision™ Advanced, to provide groundbreaking control and network view.

“The demand for high-speed networks for video backhaul continues to grow robustly, particularly now as the video landscape is transforming from HD to 4K,” said Greg Marzullo, President and CEO of Proxim Wireless. “People are increasingly turning to video cameras to deliver a wide range of benefits such as asset protection, intrusion detection, traffic monitoring, remote medical diagnostics, and distance learning to name a few. As deployments proliferate and transition to 4K, users are expecting more from their networks. Proxim's proprietary products are ideal to satisfy the high demands of these users. The success that DIP has experienced with our products is typical of hundreds of our deployments worldwide where customers are turning to Proxim when performance and reliability are key system requirements.”

About Proxim Wireless

Proxim Wireless Corporation (OTC Markets: PRXM) provides [Wi-Fi®](#), [Point-to-Point](#) and [Point-to-Multipoint](#) 4G wireless network technologies for wireless Internet, video surveillance and backhaul applications. Our [ORiNOCO®](#) and [Tsunami®](#) product lines are sold to service providers, governments and enterprises with over 2.5 million devices shipped to 250,000+ customers in more than 90 countries worldwide. Proxim is ISO 9001:2008 certified. For more information, visit www.proxim.com. For investor relations information, e-mail ir@proxim.com or call +1 413-584-1425.

Safe Harbor Statement

Statements in this press release that are not statements of historical facts are forward-looking statements that involve risks, uncertainties, and assumptions. Our actual results may differ materially from the results anticipated in these forward-looking statements. The forward-looking statements involve risks and uncertainties that could contribute to such differences, including difficulties in overcoming the network installation and operational challenges relating to any specific customer or geographical area; changes in the timing or extent of any contemplated deployments or expansions; factors beyond our control such as weather, geographic, governmental, and interference issues that may increase the costs and difficulties of wireless deployments; specific requirements of a given customer in their specific situations; whether the deployment will achieve the desired objectives of any given customer; changes in the timing, features, and other characteristics of products Proxim expects to introduce; and difficulties or delays in supplying products with the features, performance, compliances, certifications, cost, price, quality, and other characteristics desired by customers. Further information on these and other factors that could affect Proxim's actual results is contained in the filings made by Proxim with the OTC Markets (available at www.otcmarkets.com), including without limitation in the Annual Report filed by Proxim on March 30, 2010, and is and will be contained in its other public statements, which may be available on Proxim's website (www.proxim.com).
