Proxim Introduces High-Capacity Point to MultiPoint Product Line

*With Data Rates exceeding 650 Mbps, New Generation Products Lead the Way
for IoT 3.0 Applications*

Silicon Valley, CA, July 13, 2016 – Proxim Wireless Corporation (OTC Markets: PRXM), a pioneer and global leader in advanced Wi-Fi, point to point (PtP), and point to multipoint (PtMP) wireless systems, is announcing the company's newest flagship PtMP product line, the Tsunami® MP-10100 series. With this release, Proxim continues its leadership in providing carrier-class, high-performance outdoor network infrastructure to the evolving Internet of Things (IoT) 3.0 market. IoT 3.0 addresses applications that support connectivity of "things" that require data rates in the 10s to 100s of Mbps, including video cameras, WiFi off load and backhaul.

At the heart of this new platform lie Proxim's world-leading suite of technologies designed specifically for these markets and applications. With Proxim's proprietary WORP® software delivering QoS, high spectral efficiencies, and scalability for networks of things numbering in the hundreds of devices, the MP-10100 products offer all the features of previous platforms as well as backwards compatibility with the Tsunami 800 series and 8000 series.

As with all Tsunami PtMP product lines, the release of the MP-10100 series includes base stations and subscriber units, both with integrated antenna versions including an extended range model with a 28dBi antenna and connectorized versions – the full depth and breadth of products customers expect from Proxim. In addition, product options exist with an additional Wi-Fi radio included both in the subscriber unit and the base station unit, combining standard Wi-Fi and proprietary WORP software into a multi-radio, single enclosure. All of these are running Proxim's newly released, Simply Powerful, GUI.

With Proxim ClearConnect™ and Proxim FastConnect™ built into every product at no extra cost, Proxim enables highly reliable, robust operation in heavily RF congested environments as well as high speed mobility for trains, buses, ferries, and more. This is achieved in a form factor that continues Proxim's commitment to carrier class networks with IP67 enclosures and extended temperature range, at a size that is 40% smaller by volume than the Tsunami 8000 series. Proxim performance, more throughput, more range - simply more all in a smaller box.

"The MP-10100 release shows our commitment in providing the best technology for these applications to the market," said Greg Marzullo, President and CEO of Proxim Wireless. "The MP-10100 draws upon our experience in delivering many hundreds of thousands of radios for

IoT 3.0 and other applications in the most challenging of environments around the world. It is built for real world applications where clean and abundant frequencies are hard to find and harsh environmental conditions require robust solutions. This is where you find Proxim solutions perform at their best. The MP-10100 products live up to this legacy, while delivering advanced features to support the latest IoT 3.0 applications."

MP-10100 products are available to order today. Contact your normal Proxim vendor or contact Proxim directly for more details.

About Proxim Wireless
Proxim Wireless Corporation (OTC Markets: PRXM) provides Wi-Fi®, Point-to-Point and Point-to-Multipoint 4G wireless network technologies for wireless Internet, video surveillance and backhaul applications. Our ORiNOCO® and Tsunami® product lines are sold to service providers, governments and enterprises with over 2.5 million devices shipped to 250,000+ customers in more than 90 countries worldwide. Proxim is ISO 9001:2008 certified. For more information, visit www.proxim.com. For investor relations information, e-mail ir@proxim.com or call +1 413-584-1425.

Safe Harbor Statement
Statements in this press release that are not statements of historical facts are forward-looking statements that involve risks, uncertainties, and assumptions. Our actual results may differ materially from the results anticipated in these forward-looking statements. The forward-looking statements involve risks and uncertainties that could contribute to such differences, including difficulties in overcoming the network installation and operational challenges relating to any specific customer or geographical area; factors beyond our control such as weather, geographic, governmental, and interference issues that may increase the costs and difficulties of wireless deployments or otherwise impact the performance of our products; specific requirements of a given customer in their specific situations; whether the deployment will achieve the desired objectives of any given customer; changes in the timing, features, and other characteristics of products Proxim expects to introduce; and difficulties or delays in supplying products with the features, performance, compliances, certifications, cost, price, quality, and other characteristics desired by customers. Further information on these and other factors that could affect Proxim's actual results is contained in the filings made by Proxim with the OTC Markets (available at www.otcmarkets.com), including without limitation in the Annual Report filed by Proxim on March 30, 2010, and is and will be contained in its other public statements, which may be available on Proxim's website (www.proxim.com).
