## **Proxim Wireless Celebrates a Decade of Mobile Connectivity at Tranvía de Tenerife**

**Silicon Valley, CA, June 12, 2017** - Proxim Wireless Corporation (OTC Markets: PRXM), a pioneer and global leader in point to point (PtP) and point to multipoint (PtMP) fixed and mobile wireless systems and advanced Wi-Fi, today announced the ten year anniversary of connectivity for the Tenerife Tram Network.

Located in the Canary Islands, Spain, the Tenerife Tram, is a light rail/tram system that runs across the main Island of Tenerife, passing through underground tunnels and along high-speed expressways and winding around corners and densely populated localities on the Island.

Since the commencement of the tram service in 2007, Proxim's high performance Tsunami® point to multipoint mobile network solutions have offloaded live feeds from HD cameras deployed along the rail track and in the vehicles to the local NOC and security center. The deployment takes advantage of Proxim FastConnect® - Proxim's advanced mobility technology, WORP® - Wireless Outdoor Routing Protocol for guaranteed QoS and triple play application support, and Proxim ClearConnect® - suite of dynamic and adaptive, interference mitigation Radio Frequency technologies.

The deployment includes 63 Tsunami® base stations along the 16 km track and 25 subscriber stations, transmitting video feeds from the onboard surveillance cameras in the vehicles to the base station units deployed trackside.

"I am glad to announce that in the last ten years we have seen no significant downtimes in the network. Proxim's solution just performed seamlessly – consistent speeds at all times." - Pablo Martín, IT Director, Tenerife Tram. "Our security teams are able to view high quality video feeds from all the cameras connected via Proxim's Tsunami® radios."

"Ten years of operations for a complex deployment such as this proves our commitment to high performance and reliability." said Greg Marzullo, CEO and President, Proxim Wireless. "We at Proxim are dedicated to offering maximum value to our customers, and will continue to offer reliable solutions designed for mission critical applications such as the Tenerife Tram. In an era of disposable technology our customers understand that when performance matters, Proxim is the best choice for long term reliability and return on your investment."

### **Safe Harbor Statement**

Statements in this press release that are not statements of historical facts are forward-looking statements that involve risks, uncertainties, and assumptions. Our actual results may differ materially from the results anticipated in these forward-looking statements. The forward-looking statements involve risks and uncertainties that could contribute to such differences, including difficulties in overcoming the network installation and operational challenges relating to any specific customer or geographical area; factors beyond our control such as weather, geographic, governmental, and interference issues that may increase the costs and difficulties of wireless deployments; specific requirements of a given customer in their specific situations; whether the deployment will achieve the desired objectives of any given customer; changes in the timing, features, and other characteristics of products Proxim expects to introduce; and difficulties or delays in supplying products with the features, performance, compliances, certifications, cost, price, quality, and other characteristics desired by customers. Further information on these and other factors that could affect Proxim's actual results is contained in the filings made by Proxim with the OTC Markets (available at [www.otcmarkets.com](http://www.otcmarkets.com)), including without limitation in the Annual Report filed by Proxim on March 30, 2010, and is and will be contained in its other public statements, which may be available on Proxim's website ([www.proxim.com](http://www.proxim.com)).
